CYKLON		TUNIS
GRETA		UTTARIO VELVET
HAMILTON		VENUS VELVET
JAGUAR		

The test results are expressed in a 5-degree scale: 

5 means no pulling and top quality

3 and more means resistance sufficient for  household pets

1 means multiple pulling 

*metal sphere
with spikes*

WHAT?

tests do we perform? .

”

The PETPROOF fabrics come with a certificate pursuant to PN-79/P-04664, issued by the Institute of Textiles. The scratch resistance test involves placing the fabric specimen on the roller and subjecting it to the effects of metal spheres with spikes, which bounce off the rotating roller to imitate the impact of animal claws.

”

How to care for furniture?

teach your pet good behaviour

invest in special pet beds and cat tree and teach your pets how to use them by rewarding good behaviour with snacks; never allow your pets to scratch the furniture

take care of your pets' hygiene

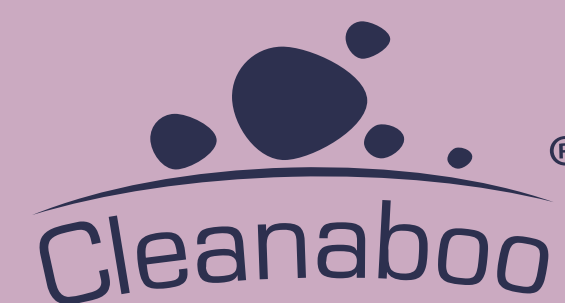

regularly brush your pets and clip their claws; thanks to it, you will reduce the quantity of fur in the entire household and limit the scratches on the furniture

do not scrub upholstery fabrics

we recommend cleaning in the direction of the bristle without using strong detergents; remove animal fur with a lint roller or moistened cloth;

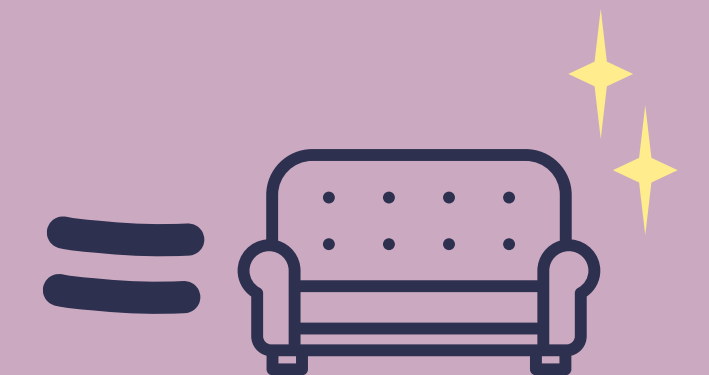

Cleanaboo
reduces
liquid
absorption

Petproof protects
the fabric against
pulling

furniture
as good
as new
