

QUILTED MATTRESS FABRICS

A few words about us

Toptextil

We are a distributor of fabrics for beautiful interiors. Our strength is our experience, which we treat as a starting point for further development. Our fabric collections allow you to find the perfect solution to your needs.

Since 2004 we have been developing our competences - we have been constantly expanding our portfolio and offering professional advice, but it is the excellent service that really makes us stand out.

A customer that sleeps well is a satisfied customer

Toptextil Comfort

Quilted mattress fabrics are fabrics intended for upholstered mattresses and borders, with width especially increased for this purpose, reaching

up to 220 or 230 cm. These fabrics have properties that promote healthy and safe sleep in favourable conditions. In addition to timeless jacquards, the range includes modern knits with heat-insulating properties or containing silk.

See how we work

Our process

Each of the fabrics we offer can be quilted and cut to required size. This is to save you time and simplify production processes in your company

The right thickness matters

Insulating layer (wadding)

Depending on the desired level of softness and convexity you want to achieve, you can choose from several weights of the insulating layer:

- 50 g/m²
- 80 g/m²
- 100 g/m²
- 120 g/m²
- 150 g/m²
- 200 g/m²
- 300 g/m²

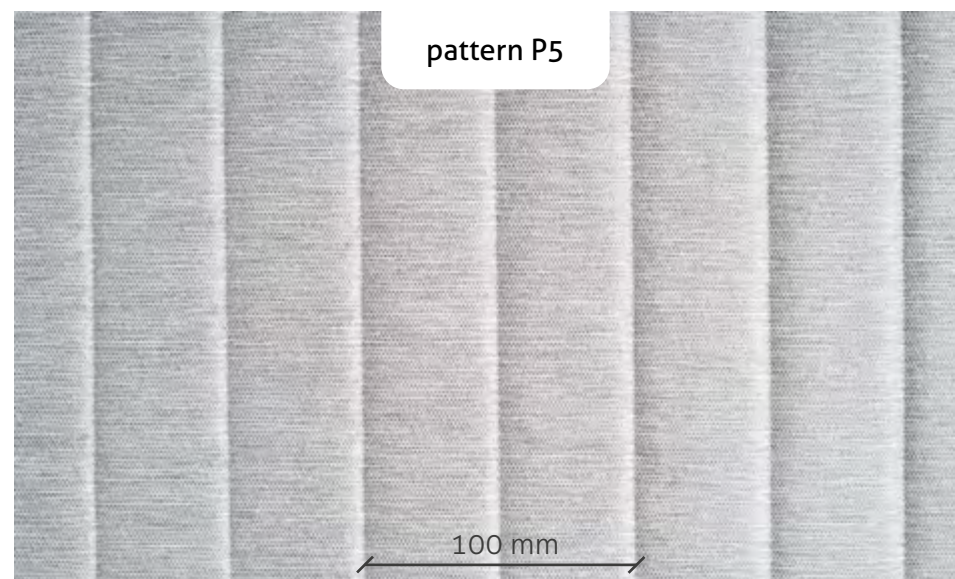

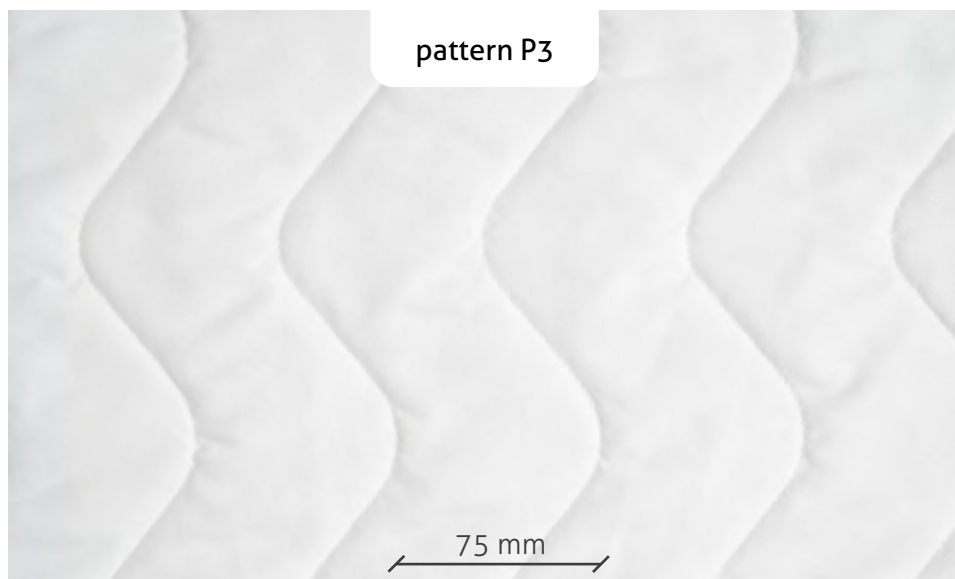

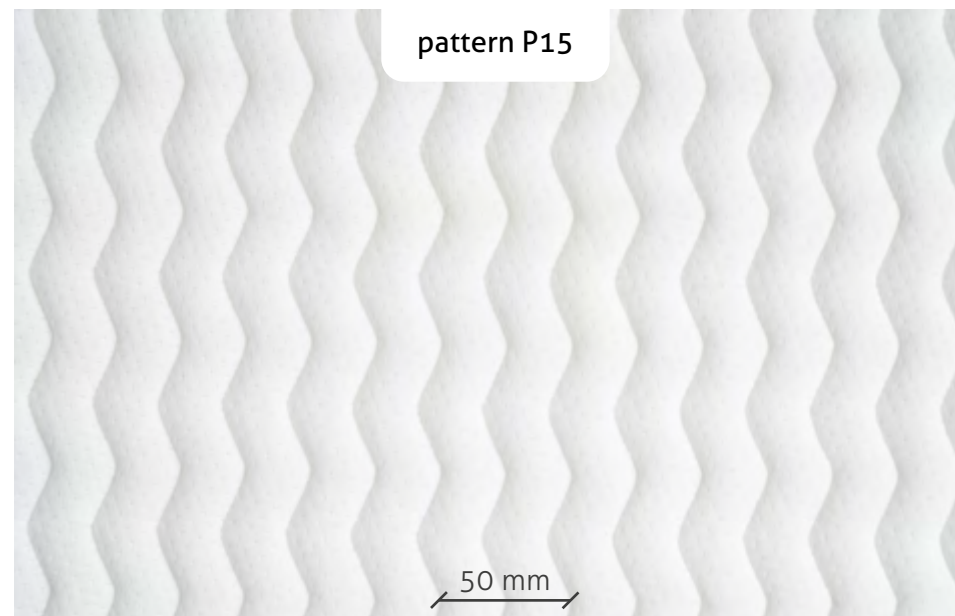

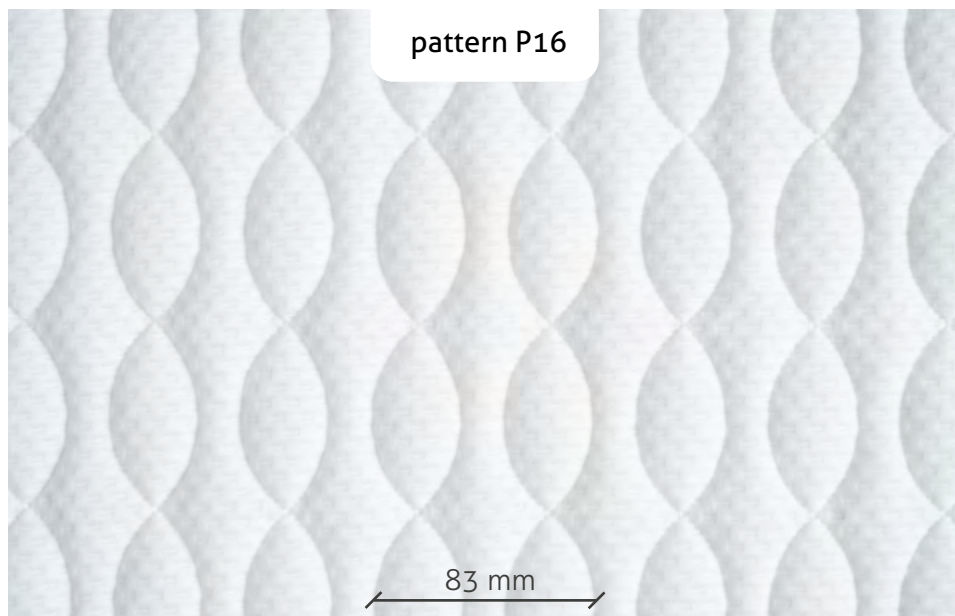

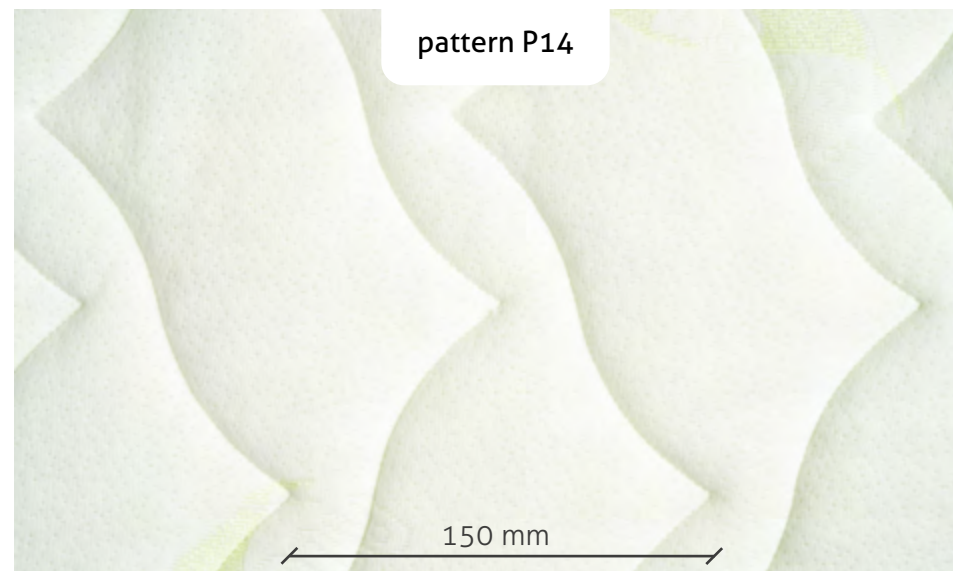

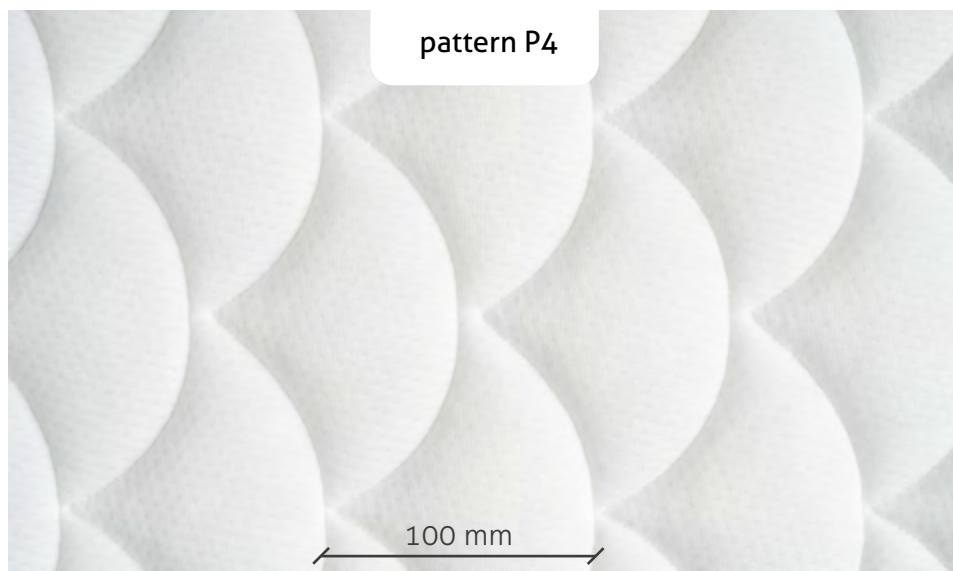

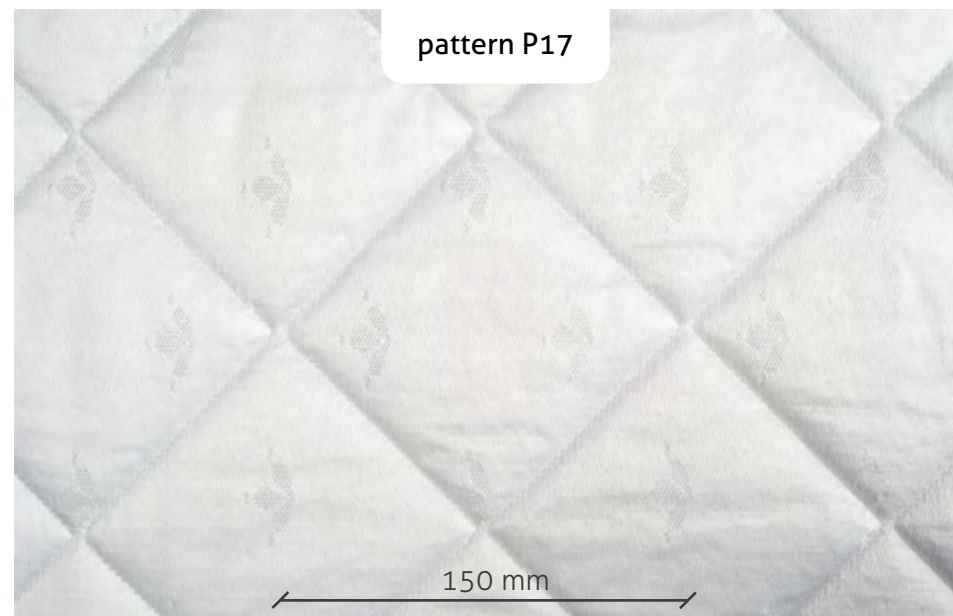

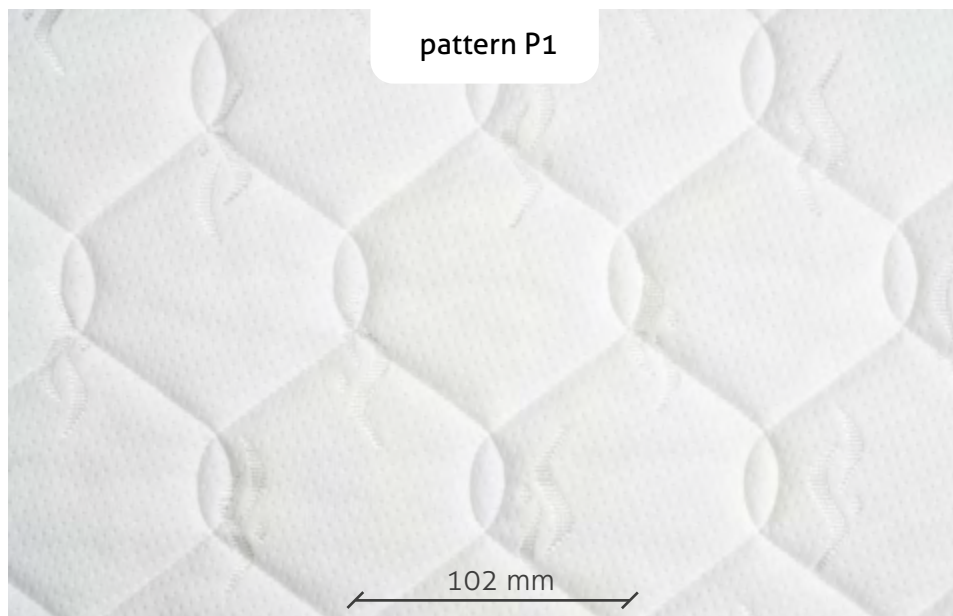

Now we're going to embroider

Quilting pattern

Thread quilting is the process of stitching a fabric to an insulation layer. As a result, the fabric becomes convex and softer, and designer stitching patterns are created on its surface to ensure even distribution of the insulation layer

We'll provide you with ready-made cuts

Formats cut to the required size

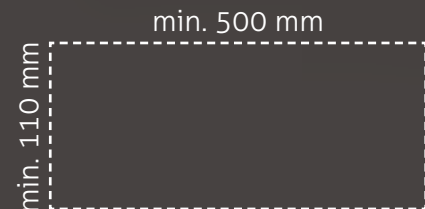

All fabrics in our range can be delivered as ready formats, i.e. rectangles cut to the required size. This will save you time spent on making manual cuts. The formats are cut using ultrasound technology and the edge of the fabric is sealed with no loose thread, so you don't have to use an overlock!

The minimum format sizes are:

- width 110 mm
- length 500 mm

The maximum size is the width and length of the fabric roll*

*for technological reasons, we cut non-quilted fabrics and quilted fabrics with max. wadding weight of 120g/m²

Professional service is our priority

Long-term Partnership

- Original collections of fabrics
- Exclusive quilting patterns
- Own machine resources
- Shipping anywhere in the world
- Marketing support and samplers
- Flexible terms of cooperation
